

The **SolarRoofs.com** “**Skyline**” 10-01
 A Revolutionary, Easy to Install Solar Hot Water Collector!
 Ideal for Residential, Small Commercial, RV, and Boat applications

Powerful 10,000 Btu Solar Water Heating Collectors

Four 10-01 collectors can heat 50 gallons of Water up to 100 degrees F, more than enough for the average family of 4. It would take **2,000 Watts (2kW) of PV** Power to do that!

The Skyline 10-01, Small Package, Big Features:

- High Performance Thermafin all copper absorber with “Black Crystal” selective coating.
- Unbreakable “Macrolux” 2 wall glazing with 10 year full Warranty against discoloration.
- 19 Pounds, only 2 lb per S/F allows for easier Permitting, easy to mount on any roof.
- With a 20” width and 6’ length, the Skyline 10-01 is easy to carry under one arm.
- Safer to carry and install, reduced liability and worker compensation risks.
- Easy to mount with a PV system by simply extending the PV rack.
- Low cost shipping by UPS, DHL or FedEx Ground.
- SRCC OG100 and FSEC ratings qualify for tax credits and rebates.
- Attractive design with 2 standard and 24 optional Architectural Trim Colors.
- The ideal complement to PV power with up to 5 Times the Power Density¹ of PV.
- Easily added to as a family grows and easy to remove and replace for re-roofing.

The Hawaii and Florida State Energy Offices Estimate that the Average All Electric Home Uses **30% of it's Total Electric Energy Just to HEAT WATER!**

Installing a Solar water heater can be like **increasing your cars gas millage by 50 to 90%!**
